

Limited Time Saffire & Supernova FX Plug-in Offer

Buy a Focusrite Saffire or Saffire LE and get Novation Supernova FX Plug-in software for Free!
 Effective dates June 15, 2009 - August 31, 2009

Purchase a Focusrite Saffire or Saffire LE between June 15 and August 31, 2009 and receive Novation Supernova FX Plug-in software free of charge, over \$89.95 worth of software for Free!

Saffire/Saffire LE

Saffire is a new breed of Firewire interface with onboard DSP and 24-bit/192kHz processing. Saffire fuses state-of-the-art hardware with highly integrated software to take audio interfacing one giant step closer to the professional studio experience. Although only the original Saffire has onboard DSP, the Saffire LE comes complete with the entire Saffire plug-in suite, offering highly acclaimed Compression, Reverb, Amp modeling and EQ in VST and AU formats.

Supernova FX Plug-in

Novation's Plug-in FX suite provides five key effects from Novation's illustrious synth heritage, including signature effects derived from the legendary SuperNova II. The five independent VST/AU plug-ins include Chorus, Delay, Tremelo, Phaser and the famously flexible, powerful filter featuring overdrive. Each and every one of them offers a significant upgrade from standard sequencer effects.

To redeem your free software, cut out or photocopy the serial number from the Saffire box and mail it together with this form and a copy of the purchase receipt (keep original) to:
